What's New in the?

Markup Assistant: A new feature that saves time when drawing plans, sections, and elevations. Markup Assistant shows you how to draw at a glance. (video: 1:45 min.) **Layers:** Revise any layer property with relative ease. Even layer-by-layer changes, and the ability to check the influence of that change on all drawings. (video: 1:09 min.) **Arrows:** New Direct Selection arrows, to further simplify working with layers and making changes with precision. (video: 1:35 min.) **Flood Fill:** Turn your wayward lines into precisely selected, cleaned up areas. Easily correct line direction, or remove perfectly parallel lines. **3D Stroke Paths:** Stroke paths are now 3D, with more control over path options. **Numerical precision:** The new operations provide improved accuracy in simple calculations, including arithmetical, in-place, decimal-to-integer, integer-to-decimal, and integer-to-integer rounding. **Dynamic Properties:** Optimizes the properties of the current drawing based on the settings of other drawings in the same drawing set. **Feature Pack:** You can now access a host of new features that are available in AutoCAD through the AutoCAD application update. Look for AutoCAD 2023 Feature Pack on the Applications tab of the My Autodesk Web Account page. **Parting Thoughts:** I know you can't read my mind. So here's the gist of what you need to know: Plenty of new tools, functions, and features: The pen tool has a new look with a new behavior. Stroke paths are new and more accurate. The default color of fills and strokes is no longer gray, but true black and white. The "Direct Selection" arrow is new. It makes it much easier to select the next, previous, or the exact location you want to select. The "Show 3D Stroke Paths" command is new. It helps you understand what is happening in 3D space as you move or modify a path. The "Show Dynamic Properties" command is new. It helps you understand what's happening as you move or modify properties of objects.
