Cannot create a vault from a.vault file
in elasticsearch 6.2 on docker,
java.io.NotSerializableException I
have a.vault file I want to download
and create a vault from it with the

REST API. I use docker on linux. There seems to be a problem with serializing the objects. The file says "Saving vault to file: Metadata will be ignored. Use 'dryRun' flag to test saving anyway" even when I use the "dryRun" flag and I get the error: "Cannot deserialize object of type [org. elasticsearch.action.support.replication. ReplicationRequest] out of START_ARRAY token" I cannot seem to find any examples of this anywhere. The code is as follows: VaultClient client = new VaultClient(); Files.asCha
