outlook. The rental market has become increasingly volatile lately due to difficulties of landlords to finance new construction. While some have assumed this is a cyclical downturn, new claims of oversupply and a difficult to qualify tenant have made it less clear. The question is how the Fed's disappointing employment report will impact the housing market. The Fed kept rates steady in their twice-a-year meeting Wednesday while declaring the economy was "at midpoint" of a "downward

economic adjustment" and a robust job market showed signs of overheating. After the statement, the yield on the 2-year Treasury US2YT=RR 10-year note, seen as a measure of a short-term interest rate outlook, rose to 2.37 percent from 2.29 percent in the prior market. The Fed's actions follow a modest recovery in US stock prices and is one of the main reasons behind the drop in the dollar since late last week. Rising yields have traditionally lowered demand for the threemonth Treasury bill, sending the

market into a downward trend. So far this year, three d0c515b9f4

Lignin-binding peptides (LBP) are novel agents that function by binding to the cell surface and being internalized. In this study, we produced an LBP in bacteria, designated as AES-67, and assessed the characteristics of AES-67 and its ability to inhibit the growth of cancer cells. We also evaluated the potential of AES-67 to sensitize cancer cells to conventional chemotherapy agents. AES-67 induced apoptosis in cervical cancer cells. In addition, it synergistically enhanced the cytotoxicity of cisplatin, a widely used anticancer agent, and 5-fluorouracil (5-FU), a promising new agent. It also potentiated the cytotoxicity of the aforementioned drugs to normal cells. Our findings indicate that AES-67 may be a potent anticancer agent for cervical cancer and warrants further investigation. Günther Jauch Günther Jauch (1912-1977) was a German actor.
