Geometry Dash: YOUR FANFARE!
MONOLOGUE - Stories of the Uncanny (Broj
1) julie morley surprise 2018 Danielle Scharf
is a second year Ph.D. student in the
Geography Department at the University of
Wisconsin, Madison. Danielle received her
B.A. from the University of Texas at Austin in
2003 where she was a member of the Union

Bankers' Association (UBA) Honor Society. She earned her M.S. in 2004 from the Graduate School of Business at the University of New Mexico. She received her Ph.D. in Geography in 2011. In 2013, she received the Rene Herre and Nan Barros Scholarship for the best graduate student. Danielle has had many research experiences including working with the Center for the Management of Mexican Infrastructure for the New World Order; the American Association of State Highway and Transportation Officials; the University of Texas Rio Grande Valley Center for Border Studies; and the Mexican Society for Geography at the University of Mexico. She has had the opportunity to work in private businesses as an analyst, policy maker, and

marketing executive. Her work has been published in the Journal of American Geography and in Climatic Research. She was awarded the 2016 Distinguished Graduate Award from the University of Wisconsin-Madison. Danielle is currently examining the use of physical and geographic information systems (GIS) and spatial statistics in the fields of transportation infrastructure planning and management, public health, and administrative science. She believes GIS and spatial statistics have the potential to provide essential solutions to global challenges of sustainability, livability, and health. She has developed an interest in the use of GIS and spatial statistics in the creation of new approaches for improving

the livability and sustainability of places. She believes that it is important to understand the context of place in order to create solutions for public health problems.

Danielle's research focuses on the development of meaningful and interactive GIS applications; the development of new methodologies in the use of GIS and spatial statistics, and their translation into the understanding of place. As she is establishing a research focus in the creation of GIS applications, she plans to develop projects in the areas of the urban canopy, pollution, and resource sustainability.
