Kelley (1935–2009) Notes External links "Introducing a new technology: the control system", American Scientist, vol. 75, no. 4, pp. 282–285, 1987. Category:Control engineering2]] and cough and sneeze^[@B3]]^ However, taking the microbiological aspects into consideration, this author states that the infection presents mainly in immunocompromised individuals, such as those undergoing chemotherapy for hematologic malignancies, or those with solid tumors, mainly solid tumors of the head and neck, lungs and breasts^[@B4]]^ However, with a view to the facts of our case, we can propose that this patient's respiratory infections were caused by multiple factors. Firstly, we can consider that the patient's lymphocytopenia and neutropenia were linked with the difficulty in controlling the infection, and with the impossibility of controlling the parasite load that infiltrated the patient's pharyngeal mucosa. Secondly, we can also highlight the role of the yeast "C. albicans" as the cause of pneumonia, as well as the presence of the atypical "Candida" spp., whose virulence was unknown. In fact, these two species have been shown to be responsible for pneumonia^[@B4],[@B7]]^ Other possible causes include: (*) the existence of a portal of entry
