Integrated into all matches, and available to unlock in dedicated modes, “HyperMotion Technology” allows players to experience every slide tackle, every feint and every head-on collision as they once have only in the real world. Key Features Motion Capture Technology Leveraging comprehensive motion capture data collected from 22 real-life footballers playing a complete, high-intensity football match in motion capture suits, “HyperMotion Technology” makes FIFA’s “player intelligence” system and player attribute improvements truly dynamic and unprecedented. FIFA 22 “HyperMotion Technology” Available in FIFA Ultimate Team, FIFA Soccer Ultimate Team Personalisation features Training mode and “Pro Player Model” features FIFA 22 introduces “Pro Player Model,” which uses

anthropometric data of real-life footballers to accurately model their individual movements in key movements including shooting, taking on defenders and crossing. During training sessions, the model will display the movements of the players to enable players to train with accurate individuals. “Pro Player Model” technology can also be used in game modes to add realistic depth to gameplay. Virtus Pro Mode and Multi-Player Squad Battles Teams of up to 20 players will now receive unique additional benefits when competing within the new Virtus Pro Mode. Players will be able to learn and improve their skills through the use of more agile players who can pass and shoot with ease, and play with awareness and speed. And when playing against a single-player squad, up to 10 additional motion capture players who will have their unique individual speed, movements, skills and attributes modelled for the match. FIFA 22 introduces the ability to view and edit your own custom-built, current/customisable, free-to-use squad, or create a new personalised squad for your club when competing against others via a new Squad Battles feature. Fifa 22 [Latest 2022]

FIFA is the most authentic football video game in the world. Every aspect of the fast-paced action and dramatic comebacks of the beautiful game has been recreated in astonishing detail with controls designed to let you control the ball and the game. FIFA 22 brings the emotion and excitement of the world's most popular sport to new heights. From the start of an exhilarating match to the heart-stopping finale, FIFA 22 brings all the drama of the real thing to your living room. FIFA 22 features a long list of innovations across every facet of the game, ensuring the most authentic experience yet. All these innovations come together to deliver a football game that's never been closer to the real thing.

Graphics The addition of Frostbite technology has delivered a game that's crisp and clear like never before. FIFA 22 features the most detailed player models, created specifically for the game engine, with over 1,200 unique player facial expressions. Worryingly for defenders, EA SPORTS FIFA 22 includes the world's first player scan-based player intelligence system, which tracks where players like Felipe Luis, Virgil van Dijk and the latest addition to the Barcelona squad - Sergio

Busquets – are most likely to be found. Controls EA SPORTS FIFA 22 has been built from the ground up with key players working directly with the developers. The result is the most precise control for the ball yet. The physics engine has been fine-tuned to match the real-world movements of the ball and players. There are also new corner-kick and free kick touch controls, and the new camera motion system lets you swing the camera around to get the best view of the action. AI EA SPORTS FIFA 22 marks the first time the AI of the world's most popular football video game has been built from the ground up. The improved artificial intelligence (AI) delivers new challenges and moments for players to take advantage of. Part of the FIFA family since 1995, every video game has included hundreds of players, but with more than 100,000 new players, EA SPORTS FIFA 22 provides the most accurate representation of the real thing. New goalkeeping system The goalkeeping system was designed with the help of goalkeepers from the world's top clubs and now features the most accurate save patterns, reflexive reactions and positioning.
