If you're considering moving to a new version of Photoshop, Photoshop Elements might be a better option than Adobe Photoshop CC. Photoshop Elements users are often resistant to moving to a different version of the software. Since they have to pay for the software, it might seem wasteful to update their license for a new version just because you're tired of the Adobe software. By comparing both programs side by side, you can see what each has to offer, but also how they can coexist. Photoshop Elements vs. Adobe Photoshop CC One of the biggest differences between the two programs is the price. Photoshop Elements is $64.99 for a one-time purchase, while Adobe Photoshop CC is $9.99 per month. The typical Adobe Photoshop license fee is $300-$500 per year or $49.99 per month. It's more expensive than Photoshop Elements at $64.99, but the difference is more than offset by the $9.99 monthly fee. You can see the difference in pricing when you consider that you could get a full Adobe Creative Cloud subscription of Photoshop for $49.99 per month. That would cover Photoshop CC, Photoshop CC Elements, Bridge CC, Lightroom CC, and other things that make Adobe Photoshop CC a complete package. Adobe CC subscription offers a free upgrade to Photoshop CC Elements if you buy the full subscription. Photoshop Elements vs. Adobe Photoshop CC Photoshop Elements and Photoshop CC are both powerful tools that you can use to change digital images. Both have their own advantages and disadvantages.
