In the related art, a hydraulic shock absorber for a vehicle or the like has been known. For example, a hydraulic shock absorber for a vehicle described in Patent Document 1 includes a plurality of hydraulic chambers and a plurality of control valves configured to control hydraulic pressures in the hydraulic chambers. The control valves are disposed on a partition wall that is disposed in a partition wall line between adjacent hydraulic chambers. The hydraulic chambers are configured to apply hydraulic pressures to a suspension of the vehicle. The hydraulic shock absorber for a vehicle is capable of controlling a compression and an extension of the suspension. Further, the hydraulic shock absorber for a vehicle includes a cylinder device and a rod device that are disposed between the control valves and the hydraulic chambers. The hydraulic shock absorber for a vehicle includes a joint cap device configured to connect the cylinder device and the rod device. The joint cap device is configured to be closed and opened by the control valve in order to form a bypass passage. A hydraulic shock absorber for a vehicle described in Patent Document 2 includes a first cylinder device and a second cylinder device. The first cylinder device includes a rod-side cylinder portion and a body-side cylinder portion. The body-side cylinder portion is coupled to the body of the vehicle. The second cylinder device is disposed so as to face the rod-side cylinder portion. The second cylinder device includes a rod-side cylinder portion and a body-side cylinder portion. The body-side cylinder portion is coupled to the body of the vehicle. The body-side cylinder portion is fluidly connected to the first cylinder device. The first cylinder device and the second cylinder device are configured to be independent from each other. Q: How to get count for one to two weeks data in BigQuery SQL I want to get the count of records for 12 weeks i.e., 4 weeks in one month, 3 weeks in next month and 4 weeks in the next month. But the problem is for 4 weeks in one month and 3 weeks in next month the results are wrong. I have the following query  
`SELECT c.date AS date, COUNT(r.OrderNumber) AS count FROM `myTable` as c LEFT JOIN `myTable2` as r`
