
Iron Man 2 Subtitles English 1080p

While the picture quality does take a step up from the 2K DI, the action sequences in this version of Iron Man 2 are a bit soft in places. A good example of this can be seen in the Warner Bros. London St. Pancras studios, where the movie is filmed. The scenes in the city look relatively sharp and crisp, yet the Iron Man's fight in the center of the street is softer, much more so than in the 2K DI. And it's no great secret that computer-generated imagery is already a bit soft at the best of times. In the scenes where Stark dons the Iron Man suit, the need for more detail and increased clarity is most noticeable, and the results are a pleasant surprise. There is some oversharpener applied to the image, but again, it's not a problem in the context of the picture as a whole, and it helps to bring out the essence of the Iron Man. (1080p Video Rating: 68/100) Whereas the 2K version offers a 1080p transfer, this new 2160p HDR10 presentation is an even bigger improvement. The crisp lines in the Iron Man suit look sharper (and are aided by the addition of fine black levels), the narrow faces of the characters are crisper, skin tones look more natural, colors are more vibrant, and overall, the picture looks a great deal more lifelike. The only aspect of the film that doesn't feel that great in HDR10 is the binning, which increases the dynamic range, which can lead to a slightly softer, more diffuse image in the scenes with the most extreme lighting. The exception to this is the sequence with the Iron Man suit, which feels perfect. The oversharpener in the graphics, that's a bit of a cheat, but it's quite subtle, and for the film's sake, it's better for the picture to look relatively pristine. It does seem to have a tendency to pull a pixel out of the monitor and into the next one, but a slight zoom back into focus usually restores the picture's integrity. There are a few instances where the chromatic noise transitions are a tad more apparent, but these are mostly small details that are well contained to the areas where they occur. As far as image noise goes, this isn't exactly film-grade quality, but the only time that this does become noticeable is during the brighter outdoor scenes and in the auto-transitioning portions of the passageways and other backlit interiors. The white level throughout this 1080p HDR10 version is essentially perfect. (HDR10 Video Rating: 98/100)

Iron Man 2 Subtitles English 1080p

It could be argued that the first film, with its attention to character, is more of a family drama; with this film, it's more of an action movie. In 'Iron Man 2,' Tony Stark is a superhero with technology that's deadly in the wrong hands (his protectors know to put the suit on just as the bad guys arrive). The film eschews big, spectacular special effects, and there isn't even a big battle sequence until the penultimate act. As a result, some of the scenes are slow-moving and more reminiscent of 30s gangster movies; there are kids on motorcycles chasing Iron Man. But in typical Favreau style, they are shot so fast and with so much energy that it almost seems like a cartoon. I must say, I quite enjoyed the way he shot the toys and the cars, and that more than anything else made the entire sequence memorable. That doesn't mean the film is without a few problems, such as its one weak plot line. Iron Man's interest in War Machine seems a bit skewed, and we find out that he was dating Rhodey's wife (Michelle Yeoh) and was friendly with Rhodey, which I found to be an odd choice. They're in love with each other, and if that's the case, why is Rhodey hanging out with Tony? Furthermore, during the first film, we really didn't expect Tony to take off his suit and go shirtless, although the reality of what his chest looks like later on provided extra glee for the people who did

watch the previous film. The biggest problem, however, is how thin the plot is. The movie is called 'Iron Man 2.' It's about a guy in a suit of armor called 'Iron Man.' It's a two-disc thing. So what do we do to 'Iron Man 2?' The answer: We do the same thing we did to 'Iron Man.' We do a good job and make it the best 'Iron Man' we can. 5ec8ef588b
