KEPware Enhanced OPC DDE KEPServer V4.500.465

kepware's opc tunneling solution uses a client/server architecture for secure and reliable real-time data tunneling through firewalls and across the internet, wan, or lan. it allows for easy remote communications between devices, data sources, and applications by eliminating the reliance on microsoft com and dcom technology. what can be accomplished with kepware's kepserverex, and the addition of the opc tunneling, can be expanded with the ability to add application level redundancy. this allows users to quickly and easily establish redundancy, ensuring reliable communications with critical assets. in the event of a failure, app level redundancy allows the duplicate device or redundant system to take over without interrupting servicepreventing data loss, maximizing uptime and increasing the availability of industrial data. app level redundancy supported includes: there are many different ways to implement data

collection, from one-off solutions to integrated, enterprise-wide solutions. however, for us, kepware's kepserverex was an easy and effective way to deploy a solution that could be tailored to our needs. download kepware enhanced opc dde kepserver v4.500.465: the free open source software (foss) for connecting and managing industrial data. kepware's opc dde kepserver is a robust solution for connecting industrial data applications over your local network. with it you can: ● connect your industrial applications to communicate and exchange data with each other● provide secure and reliable connectivity to other industrial data applications and devices● manage and control the industrial data in a connected and centralized manner● redirect data to and from the company's erp system, scada, or dcs, or to any other fieldbus, hmi, or graphical terminal● send and receive messages to and from an opc compliant

fieldbus or controller● receive and send opc requests and respond to them directly● be notified of changes in opc data in your data applications and devices through change notification

KEPware Enhanced OPC DDE KEPServer V4.500.465

KEPServer is already proven technology and it is not yet open source. Everyone will adopt it as soon as they get around the Kepware Licensing and Compliance requirements. Else, they will have to shutdown their business. That's why The Kepware Development Team must make their client based software open source free community version like Android was, Nokia was, and now Amazon is doing. Only then, will Kepware's standard will surpass the competition. And they will attract the same kind of users the same way the Linux was born and became the biggest OS ever. Moreover, the Developers who have been using Kepware's software for years will migrate to the latest version as and when the old version gets deprecated. LANSING, Michigan, October 4, 2016 /PRNewswire-FirstCall/ -- Kepware, Inc. today announced the release of the 2018.1 version of its

widely used Kepware Enhanced OPC DDE KEPServer (KepDDE) communication software. Key enhancements include the ability to send messages through a secured, encrypted TCP/IP tunnel, the addition of a Dynamic Message Locator for streaming operation, support of the OPC UA Client and Server APIs and the development of a new OPC DDE profile for the data exchanged between KepDDE and the OPC DDE Data Source. The new release also includes a number of enhancements, including: PORTLAND, Maine, October 7, 2017 /PRNewswire/ -- Kepware, a PTC Inc. business developing industrial connectivity software, today announced the release of KepDDE Server 6.2 connectivity software. The new release is a natural evolution of Version 6, further strengthening the industrial connectivity platform's core server functionalities that support operational intelligence and the rapid development and deployment of Industrial

Internet of Things (IIoT) solutions. Key updates include an improved OPC Client driver, expanded Configuration API capabilities, and new connectivity mapping features. 5ec8ef588b
