Easily create and share animated Desktop Wallpapers, Windows or Mac. Create personalized wall 2edc1e01e8

## PCS Viewer (LifeTime) Activation Code

PCS Viewer is a free Color Scheme viewer for Windows that allows you to view, open, display and edit color schemes that you have been downloaded from color scheme gallery or created with Pixel Pick or Blend. It can also display the color values, RGB, CMYK, HSB, HEX or Web color values. It's free for home and personal use. Stuck in the middle of a recession, one Italian woman took to Twitter to protest the country's rampant spending habits. Luckily for her, she was soon overwhelmed with support and free publicity for the campaign. On December 28, 39-year-old Franca De Luca tweeted a picture of herself holding up a sign that read: "I'm a single mother, I'm not stupid." The sign went viral, and De Luca ended up being interviewed on CNN, Fox News and the BBC. De Luca's campaign was the result of a conversation she had with her son while sitting in a shopping center parking lot. De Luca said she asked her son, whose name has not been made public, if he wanted to buy anything. Her son said he didn't. So, she told him that she was "stupid" and bought him a sandwich. Related: French factory workers win right to an hour's break De Luca later said that she was embarrassed to spend money for the sandwich, but her son asked her why she'd spent money when she could have just given it to him. "It was hard to say no," De Luca told Italy's Corriere della Sera. "But I couldn't say yes to him because I would feel ashamed. I can't eat lunch with him every day." De Luca isn't the only mother taking a stand against excessive spending. After news of De Luca's campaign spread, thousands of other Italian mothers began sharing similar stories about how they were unable to afford to buy food for their children because of the country's high food prices. Now that De Luca is being honored for her campaign, she's hoping her story will influence others to get in touch with their own families to "admit mistakes and to recognize them as realities."
